Maria Vergés

1. INTERVIEWS TO EXPERTS

2. FORECAST TRENDS IN 10 YEARS TIME

2.1 Education

According to an interview to a teacher, we think that education will be:

- More customized, personalized
- The basic content will be taught using internet
- One of the most important classes will teach how to filter the true information from the internet

- ❖ The education system will change to be more specialized and personalized
- ❖ The number of teachers will increase as their work will be more appreciated.

2.2 Agriculture

According to an interview to a farmer, we have predicted how agriculture will be in 10 years:

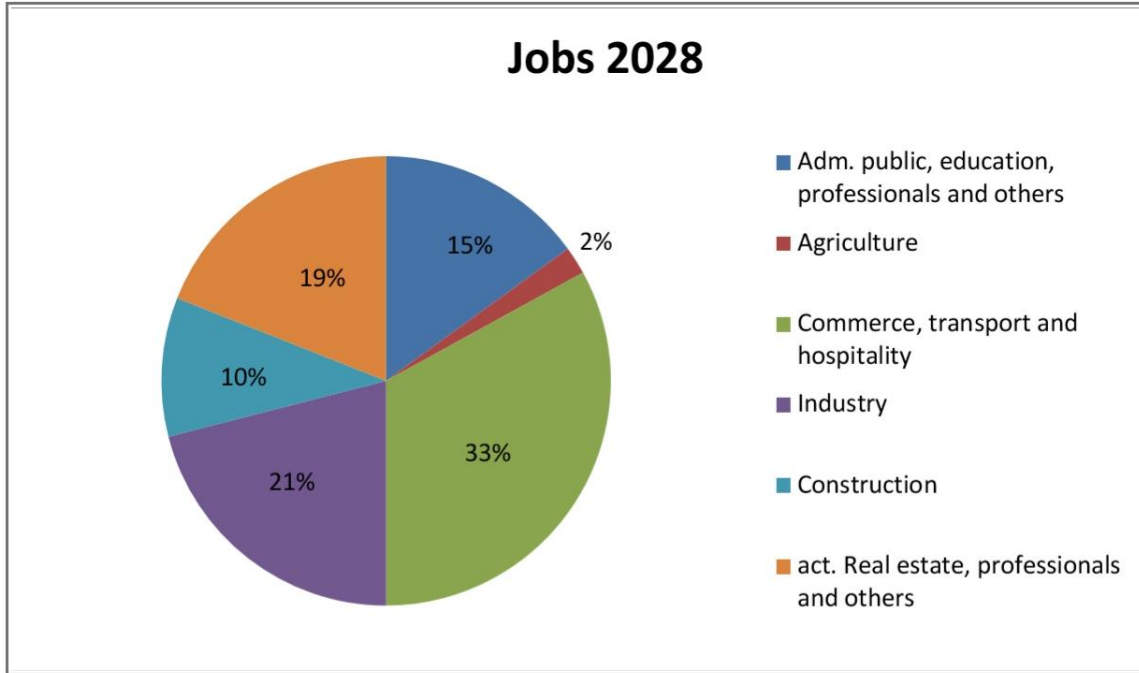

- Machines will be able to substitute workers and therefore less people will work on farms.
- The climate change will play a very important role, as some crops that need a lot of water such as corn will have to modify the periods of cultivation

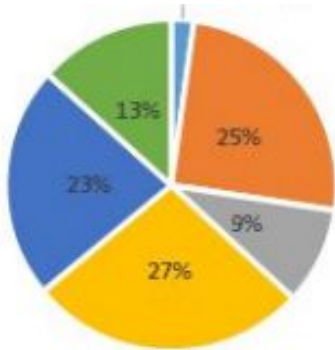

- ❖ Agriculture will change a lot and technology and climate change will play an important role
- ❖ There will be less people doing this job in 10 years as it isn't well-paid
