

Thursday, 14th December 2017

On Thursday we continued our work in groups and presented our results to the other students and voted on the product for our mini company. We had the choice between an e-book for educational purposes and the “Pen and Pencil”, the Pen and pencil won the vote. The product is a tool that serves as a pen and a pencil in one. After the short presentations we went on our way to Rostock, where some German students showed everyone around and then went to the Christmas market until the evening.

Altogether the project was fun, even though we had to work a lot we met many new people, learned new things and made new friends. Now we're really excited for the next meeting to continue the ERASMUS + project.
